7 Years	₹2L+/month	3 Roles
Cross-functional experience	Live P&L owned & analysed	DA · BA · Power BI Dev

Data Analyst & BI Developer who turns raw data into decisions that move revenue. What sets me apart: I co-founded and ran a live restaurant business — owning the full P&L, onboarding onto Zomato and Swiggy, and building Power BI dashboards from 1,000+ real monthly transactions — giving me something most analysts lack: genuine business ownership behind every metric I build.

CORE SKILLS & TECHNICAL EXPERTISE

BI & Visualization	Power BI (DAX · Power Query · Custom Visuals · Drill-through · RLS · Power BI Service · Scheduled Refresh), Tableau, Excel Advanced Charts, KPI Dashboards, Data Storytelling
SQL & Databases	SQL (CTEs · Window Functions · Subqueries · Stored Procedures · Query Optimisation · Indexing), MySQL, SQL Server, Data Extraction, Transformation & Validation
Python & Analytics	Python (Pandas · NumPy · Plotly · Matplotlib), EDA, Trend & Variance Analysis, Cohort Analysis, Funnel Analysis, A/B Testing, Forecasting, Root Cause Analysis, Data Modeling, ETL/ELT
Business Analysis	Requirements Gathering · Stakeholder Management · Gap Analysis · Process Analysis · User Story Writing · Business Case Development · Data-Driven Decision Making
AI & Modern Tools	Claude · Power BI Copilot · ChatGPT for SQL/Python · GitHub Copilot · AI-Assisted Analytics · Prompt Engineering
Delivery & Methods	JIRA · Confluence · Git · Agile/Scrum · REST APIs · Documentation · Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Co-Founder & Data / Business Analyst · **Roy's Kitchen** *Jan 2024 – Present*

- **₹2L+/mo ·** Co-founded a profitable restaurant generating ₹2L+ monthly revenue (~40% margin); led digital expansion onto Zomato and Swiggy, unlocking a new revenue channel and live order analytics stream
- **10+ KPIs ·** Designed and deployed Power BI dashboards tracking 10+ KPIs across revenue, product mix, and customer retention — replaced manual spreadsheet reporting, saving 5+ hours of analysis per week
- Wrote advanced DAX measures (CALCULATE, SUMX, RANKX, time intelligence) and Power Query transformations to automate data cleansing, enabling dynamic drillable reports for daily decisions
- **15–20% uplift ·** Analysed 1,000+ monthly transactions using SQL and Python (Pandas) to uncover behaviour patterns; data-driven changes to pricing and promotions drove a 15–20% improvement in repeat customer rate
- **60% efficiency ·** Automated recurring weekly and monthly reporting using Python scripts and SQL, reducing manual effort by 60% and improving leadership data availability

Software Developer — Data & Reporting · **Korn Ferry** *Jun 2023 – Oct 2023*

- Gathered and translated business requirements into technical data specifications; delivered data-driven reporting solutions aligned with stakeholder analytical needs
- **20–25% perf ·** Analysed structured data and API outputs to support analytics features; identified optimisation opportunities improving application performance by 20–25%
- Designed and executed data integration, validation, and QA workflows ensuring pipeline accuracy, data completeness, and availability

System Engineer II— Data & Analytics · **Tata Consultancy Services (TCS)** *Aug 2022 – Nov 2022*

- **10K+ records ·** Executed SQL-based data analysis on large datasets (10K+ records) for reporting, business process analysis, and validation workflows
- Delivered analytical outputs for cross-functional Agile teams; collaborated with stakeholders to gather requirements and translate them into data solutions

UI / Front-End Developer · **DXC Technology · Quantum Infocom** *Aug 2018 – Jun 2022*

- **15–20% perf ·** Built data-driven applications integrating REST APIs and relational databases; wrote SQL for dynamic data handling and improved app performance by 15–20%

KEY PROJECTS

Loan Data Analysis Dashboard · Python · SQL · Power BI
Analyzed 50K+ rows using Pandas & SQL; built interactive Power BI dashboard tracking approval rates, risk, and customer segments.

Restaurant Performance Analytics · Power BI · Excel · Python
Built dashboards on live business data (₹2L+ revenue, 1,000+ transactions/month); improved customer retention by 15–20%.

Sales & Profit Analysis Dashboard · Power BI · DAX
Developed KPI dashboards using advanced DAX; automated reporting, saving 3 hrs/week.

Deloitte / BCG / TCS Simulations · Tableau · Excel
Created dashboards, campaign analysis, and executive-level reports across virtual consulting projects.

EDUCATION

B.Tech — Electronics & Communication
West Bengal University of Technology · 2018 · GPA 8.1/10
15 years full-time education

CERTIFICATIONS

IBM Data Analyst Professional Certificate (Coursera) – In Progress
Deloitte Data Analytics Simulation · Tableau & Excel (Virtual, 30 days)
BCG Analytics Simulation · Campaign & Conversion Analysis (Virtual, 30 days)
TCS Data Visualisation Simulation · Executive Dashboards (Virtual, 30 days)
