AMIT ROY

Data Analyst | SQL • Power BI • Python | Business & Financial Analytics

Data Analyst with 5+ years of experience in SQL, Power BI, and Python, specializing in transforming transactional and business data into actionable insights. Proven track record of building KPI dashboards, automating reporting, and driving revenue growth through data-driven decisions. Strong experience working with real-world business data, stakeholder collaboration, and analytics-driven strategy. Seeking remote global opportunities to contribute to high-impact data teams.

CORE SKILLS

BI & Visualization	Power BI, DAX, Power Query, Tableau, KPI Dashboards, Data Modeling
Data & Databases	SQL (Joins, Subqueries, CTEs, Window Functions, Stored Procedures, Query Optimisation, Indexing), MySQL, SQL Server, Excel (Pivot Tables, VLOOKUP, Power Query), Python (Pandas, NumPy, Data Cleaning, Data Analysis)
Analytics	Exploratory Data Analysis (EDA), Trend Analysis, Variance Analysis, A/B Testing, Cohort Analysis, Funnel Analysis, Forecasting, KPI Design, Data Storytelling, Data Transformation
BA & Process	Requirements Gathering, Process Analysis, Gap Analysis, Stakeholder Management, Business Case Development, User Story Writing, Reporting & Analysis, Root Cause Analysis
Tools & Methods	JIRA, Confluence, Git, Agile/Scrum, REST APIs, ETL/ELT, Data Pipeline, Data Validation, Power BI Service, Scheduled Refresh, Row-Level Security (RLS)

PROFESSIONAL EXPERIENCE

Co-Founder & Data / Business Analyst | Roy's Kitchen (Family Business — Co-Founded) *Jan 2024 – Present*

- Co-founded and scaled a profitable restaurant business generating ₹2L+ monthly revenue (~40% margin); led digital expansion on Zomato and Swiggy, creating a new online revenue stream and structured transactional dataset
- Designed and deployed interactive Power BI dashboards tracking 10+ KPIs (revenue, product mix, retention), replacing manual reporting and saving 5+ hours/week in analysis
- Analysed 1,000+ monthly transactions using SQL and Python to uncover customer behaviour insights; optimised pricing and promotions, increasing repeat customer rate by 15–20%
- Built automated data workflows using Power Query, DAX, and SQL; translated financial and transactional data into actionable insights to support business strategy and operational decisions

Software Developer (Data & Reporting Focus) | Korn Ferry *Jun 2023 – Oct 2023*

- Gathered and translated business requirements into data-driven reporting solutions for cross-functional stakeholders
- Analysed structured data and backend API outputs to support analytics features; identified optimisation opportunities improving application performance by 20–25%
- Designed and executed data integration, validation, and QA workflows ensuring reporting pipeline accuracy and reliability
- Delivered data insights and reporting solutions to support business decision-making across teams

System Engineer – Data & Analytics | Tata Consultancy Services (TCS) *Aug 2022 – Nov 2022*

- Performed SQL-based data analysis on large datasets (10K+ records) for reporting and business process analysis
- Assisted in data validation, reporting, and business process analysis within cross-functional Agile teams

UI / Front-End Developer | DXC Technology | Quantum Infocom *Aug 2018 – Jun 2022*

- Built data-driven web applications integrating REST APIs and relational databases; improved app performance by 15–20%
- Handled backend data flows, API integration, and data accuracy checks across multiple enterprise projects

KEY PROJECTS

Loan Data Analysis Dashboard | Python · SQL · Power BI

EDA on loan data; built interactive Power BI dashboard tracking approval rates, loan distribution, and risk metrics using DAX and SQL transformations. Analysed financial transactions and risk indicators to identify patterns and support lending decisions.

Sales & Profit Analysis Dashboard | Power BI · DAX

Dynamic Power BI report with advanced DAX (CALCULATE, SUMX); trend and variance analysis highlighting underperforming regions and products.

Restaurant Performance Dashboard | Excel · Power BI

Analyzed real business data (₹2L+ monthly revenue, 1,000+ transactions); KPI dashboards for revenue, product mix, and customer behavior — drove 15–20% retention uplift. End-to-end project available on GitHub with data cleaning, analysis, and visualization

Deloitte / BCG / TCS Simulations | Tableau · Excel

Built Tableau dashboard (Deloitte); analyzed multi-channel marketing campaign data for BCG; prepared executive-level insights and reports for TCS leadership.

EDUCATION

B.Tech – Electronics & Communication

West Bengal University of Technology | 2018 | 8.1/10

CERTIFICATIONS & SIMULATIONS

IBM Data Analyst Professional Certificate (Coursera) – In Progress
Deloitte Data Analytics Job Simulation | Tableau, Excel
BCG Marketing Analytics Simulation | Campaign & Conversion Analysis
TCS Data Visualisation Simulation | Executive Dashboards
